

## YIC Visit to JIC-NDT Training Center

**November 12, 2012** – a delegation from the Mechanical Engineering Technology Department at Yanbu Industrial Collage (YIC) had visited the NDT Training Center at Jubail Industrial Collage. The purpose of this visit was to strengthen the relationship between the two collages, since YIC is in the process of establishing an associate degree in inspection for NDT, Mechanical and Heavy Equipment, therefore they were interested to visit NDTTC/JIC facilities in order to learn from our experience in the NDT program, as well as establishing a bridge of collaboration between the two institutions.
